Re: *Coordinated RMBS Trustee Actions Against HSBC Bank USA, N.A.*,  
Nos. 14-cv-08175; 14-cv-09366; 14-cv-10101; 15-cv-02144; 15-cv-10032

Dear Andrew:

On behalf of Plaintiffs in the above-referenced actions,<sup>1</sup> we write to follow up on the parties' meet and confer discussions regarding Plaintiffs' draft proposed Loan File Re-underwriting Protocol ("LFRUP") and Plaintiffs' July 24, 2016 and July 30, 2016 correspondence, and in further response to your July 13, 2016 letter.

Plaintiffs submit that the draft proposed LFRUP addresses Judge Netburn's Order and instructions during the June 29, 2016 hearing that the parties should reach agreement on a protocol that addresses for sampling purposes "what is the loan size, what loans are in that loan sampling, and whether or not each loan file is complete."

Following the June 29 conference, HSBC's July 13 letter demanded certain information from Plaintiffs that sought premature expert discovery through inquiries that are irrelevant to the Court's instructions. Additionally, certain of HSBC's inquiries concern expert damages opinion evidence, which have been the subject of detailed interrogatory responses already provided to HSBC. Nevertheless, during the parties' meet and confer discussions, HSBC reiterated its request for additional information. Accordingly, without waiver of our objections, we provide the below supplemental information in an effort to further explicate the sampling methodology Plaintiffs intend to use. This information is provided solely to assist the parties in reaching agreement regarding a LFRUP and Plaintiffs reserve all rights to modify any sampling methodology in the event the parties are unable to reach agreement.

---

<sup>1</sup> The *Triaxx* Plaintiffs are not planning to sample.

***The Loan Population And Criteria Used To Include And Exclude Loans In The Sample***

Paragraph 3 of the proposed LFRUP provides that Plaintiffs will “explain the sampling methodology and criteria for drawing” the sample on an agreed-upon date. Nevertheless, in the interest of advancing discussions and reaching agreement, Plaintiffs provide the following additional information regarding the loan population and criteria used to include and exclude loans in the sample.

The relevant “population” of loans excludes loans identified as paid in full (“PIF”) and therefore the samples exclude PIF loans.<sup>2</sup> A simple random sample of 100 loans was selected for 22 out of the 24 trusts (the “SRS”). For WFMBS 2006-19, the sample size is 66 because the population of loans excluding PIFs was only 66. For WFMBS 2007-5, the sample size is 53 because the population of loans excluding PIFs was only 53. The samples are statistically independent.

The total number of “Initial Sample Loans” for all plaintiffs is 3,662.<sup>3</sup> The balance of Plaintiffs’ sample disclosure consists of “Backup Loan Samples” that are intended to match the originally sampled loan on several characteristics, including the trust, supporting loan group (“SLG”), whether the loan was non-performing or performing, and whether the loan was liquidated or non-liquidated. Within each trust, there are up to 16 categories, based on the cross-classification of up to four SLGs, two liquidation statuses, and two non-performing statuses. Plaintiffs’ disclosure consists of approximately the same number of Backup Loan Samples as there are Initial Loan Samples, with an equal representation of the 16 categories, to the extent such loans were available. *See Exhibit A* attached hereto (Excel spreadsheet showing Initial Loan Samples and Backup Loan Samples for each trust sorted by category).

As described below, for some of the trusts, the SRS of 100 loans was supplemented by NCUA, Phoenix Light, and Royal Park.

In the Phoenix Light and NCUA actions, for each of the 5 trusts ACE 2005-AG1, DBALT 2007-OA1, NAA 205-AR6, STALT 2006-1F, and WFHET 2007-2, the initial SRS of 100 loans was supplemented to include 100 non-performing loans. A non-performing loan is defined as a loan that was ever delinquent by 90 days or more.

In the NCUA action, for each of the 2 trusts ACE 2006-OP2 and MHL 2007-1, the initial SRS of 100 loans was supplemented twice. First, additional non-performing loans were selected so the sample would include 100 non-performing loans in the full trust sample. Second, additional non-

---

<sup>2</sup> A loan is considered to have been paid in full if it was paid off with no loss to the trust according to MBSData.

<sup>3</sup> Of this number, 2,319 loans will be used by BlackRock, 920 loans will be used by NCUA, 400 loans will be used by Phoenix Light, and 1,200 loans will be used by Royal Park. Commerzbank intends to utilize the same sample as Phoenix Light and NCUA for the ACE 2005-AG1 trust. As previously noted, Triaxx is not sampling.

---

performing loans were selected from SLG 2 so the sample would include 100 non-performing loans from SLG 2.

Also in the NCUA action, for trust NHELI 2007-1, the initial SRS of 100 loans was supplemented twice. The sample was supplemented once to include 100 non-performing loans from SLG 1 and was supplemented a second time to include 100 non-performing loans from SLG 2. Each supplementation involved selecting a SRS of additional non-performing loans from the respective SLG not previously selected.

Finally, in the Royal Park action, for each of the 3 trusts DBALT 2006-AR5, FHLT 2006-C, and WFHET 2006-2, the SRS was supplemented to achieve a sample of 400 liquidated loans from the trust. A liquidated loan is defined to be a loan that was liquidated at a loss.

***How Was The Sample Drawn – Simple Random Sample Or Stratified?***

The Sample is a simple random sample.

***What Is The Full Set Of Quantities That Plaintiffs Intend To Measure From The Sample?***

The sample will be used in connection with Plaintiffs' loan file reunderwriting and examination of loan servicing to identify the percentage of defectively originated and serviced loans within the Bellwether Trusts.

***On What Groups Of Loans Are Plaintiffs Going To Use The Sample To Make Inferences, And What Is The Methodology Pursuant To Which Plaintiffs Intend To Make Extrapolations?***

The BlackRock Plaintiffs and Royal Park are representing classes of investors and thus intend to use their respective samples to support expert opinions concerning each of the SLGs and/or trusts covered by their respective classes. NCUA, Phoenix Light, and Commerzbank are direct actions and will use their samples to support expert opinions regarding the damages to their certificates caused by HSBC.

***Will The Quantities Being Measured Be Used By Plaintiffs To Try To Assess Liability And/Or Damages In This Case, And If So, How?***

The sampled loans will be re-underwritten and the servicing activity on those loans will be examined and the experts' findings will be used as evidence supporting Plaintiffs' claims of underlying Seller and Servicer breaches and HSBC's knowledge thereof. Plaintiffs refer HSBC to the BlackRock Plaintiffs' response to HSBC's Interrogatory No. 1 for an explanation as to how Plaintiffs intend to incorporate the results of the experts' re-underwriting and re-servicing of the sampled loans to assess Plaintiffs' damages.

We believe this information, together with the draft proposed LFRUP and the parties' meet and confer discussions to date, provide HSBC with sufficient information to evaluate and understand

the LFRUP and provide its comments or suggested edits. To that end, please let us know your availability to meet and confer early next week.

Sincerely,

/s/ Benjamin Galdston

Benjamin Galdston
